This is in response to Papers filed on 09 January 2007.

I. Publications filed on 09 January 2007 have been considered as those in the parent application 10/117,910.

II. The following is an examiner's statement of reasons for allowance:

A. The declaration under Rule 132 filed on 09 January 2007 (with none of the applicants' signature) for the patentability of the claims as broadly disclosed has been considered. The lithographic printing processes as tested on glass using large amounts of soap do not provide good results being acknowledged.

B. It is known in the art that there are lithographic printing plates having an image area having a hydrophobic property. Evidence can be seen in Krishnan et al on col.1:64. However, Krishnan et al disclose, teach, suggest and practice with the "waterless" Toray type lithographic plate having the image area having a hydrophilic property.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
